What kind of problem are you having with your phone? Physical Damage repairs include problems with cracked or broken screens, lcds, audio issues and just basic scuffs and scratches; or the top portion of your slider or flip phone coming loose, or even broken in 1/2! Software issues can range in variety so be specific when describing your problem.

Example: (I cracked the glass/screen on my iPhone and need to have it replaced, or I can hear people who call me, but they can't hear me!)
